**Subject:** EPA Priorities

Dear Administrator Pruitt,

I live in Michigan and am a wife and mother. My background is in science and environmental education so I am well-versed in the role and job of the EPA as well as the underlying scientific premises of environmental protection. I am very concerned about the direction I see the EPA going. It used to be that you could go to the EPA FB page and get lots of useful information for citizens. Once the new President was inaugurated, all of that information stopped. Now that you have been confirmed the EPA FB pages and Website have turned into a promotional venue for yourself. All that has been updated are pictures, articles, interviews - all extolling your virtues while offering NOTHING of substance for citizens.

What are your plans regarding helping those without drinkable water in Flint?

What are your plans addressing climate change?

What are your plans on upholding Clean Air and Clean Water protections?

Will you be upholding the Endangered Species Act?

I have two young daughters and I would like them to grow up in a healthy world. Not one that has allowed the pollution of our lands and waters in order for corporations (like oil and gas) to become richer.

I am very concerned about your motivations for wanting to run this agency. I would hope that you uphold and defend the intent of the EPA and help to continue to preserve the health of our world for generations to come. I would hate to see our environment and my daughters' futures compromised so that others can make more money.

I implore you to please think of future generations as you move forward with your and the Trump administration agendas. What good will tons of money be if you don't have quality air or water?

Thank you for your time.

Sincerely,

Jennifer Malinowski
